# SENOCELL®

**WEILBURGER Graphics GmbH** +++ product information on SENOCELL® solvent and water-based varnishes, stains and paints +++

## SENOCELL®

In the SENOCELL® product class we market a wide range of solvent and water-based pencil varnishes, stains and paints and dipping lacquers for brushes. These products are optimised for continuous pusher, dipping and drum processes and available from matt to high gloss. The paints come in a wide range of colours.

The SENOCELL® class as a whole comprises a large number of products. For further information we and our sales partners worldwide are pleased to be at your service at all times.

### Example products:

#### **SENOCELL® POLISHING HIGH GLOSS COSMETICS 380750**

Ultra high gloss, fast drying, perfect surface coating – such are the demands made by the market on the production of cosmetic and other high quality pencils.

With our high gloss finish polishing, we show that these demands can be achieved long-term.

#### **SENOCELL® POLISHING COLOURLESS MATT 380025**

By using this polishing you give your product a matt, high class look. Whether you are talking about high quality cosmetic or other pencils, this product is the right solution for both.
